

Internet Programming II

Lab Assignment:

Write VB.NET programs for each of the following task:

Task 1:

Clear message in a Label control by clicking button "Clear Msg" (button click event).

Task 2:

Display message Good morning or Good afternoon in a label control once the page loads (page event)

Task 3:

Hide/show message in a Label control by clicking button "Show Label" or "Hide Label" (button click event).

Task 4:

Transfer text from one Textbox to another (button click event).

Task 5:

Redirects a user to a new page once the user selects a file name from a Drop-Down-List control.

Task 6:

Detects which item has been checked from a set of Radio Buttons and displays message in a label control.

Task 7:

Display hyperlink with either text "Visit Morning Session" or "Visit Afternoon Session" based on the time of the day.

Task 8:

Create a simple calculator user interface.
